

Citizens Beware

Your current city leaders are threatening to take private property to build an \$11 million dollar airport at the city park, sports park and fairgrounds. This puts citizens and their children in danger and cannot be tolerated.

They claim a new airport is needed to attract industrial and corporate development. We attracted the largest industrial development around because they realize Greensburg is already surrounded with transportation infrastructure to meet their needs.

Now they want to set up an Airport Authority that will be able to levy taxes on your property and take land by eminent domain as they see fit. This too cannot be tolerated.

They will meet at 6:00 PM November 5th at City Hall to decide your fate. Please come, stand up and be counted before it's too late.

- No Corporation has advocated an expansion nor has the general public shown any interest.
- It would disrupt the peace and quietude of the park area and the residential developments along Park Road.
- No airport sustains itself financially and will have to resort to taxing the citizens for an airport that nobody has said they want except those few who own leisure weekend airplanes.
- This airport project benefits few people and is of no use to the general public.
- Taxpayers will end up supporting and sustaining it's maintenance and servicing of this huge debt for no apparent reason.
- Out of town suppliers are only twenty minutes from the Shelbyville airport to Greensburg.
- Our property taxes do not have to support Shelbyville, Columbus, Indianapolis or Cincinnati Airports but they all can service our needs.
- One slip up could harm hundreds near the runway with more and larger airplanes.
- If an airport need is ever shown we should seek out a safer better location far from town.
- The old airport could someday be used as an addition to the park, fairgrounds or more softball diamonds that could host large tournaments to bring in thousands.
- In a few years Greensburg will know what, if any, air transportation facilities will be needed and what direction to take to fill that need.
- It will involve taking of private property against the will of the owners.

*It's time local government was for you
not in spite of you...*

It's time for taking back the our community...

It's time for a change in leadership...

*It's time to let the people decide when and where
a new airport should or shouldn't happen...*

It's time to show you care...

*It's time to get out and **VOTE!!!***

We support these candidates:

Mayor – Gary Herbert

City Council District One – Herb Hunter

City Council District Two – Bill Wenning

City Council District Three – Jamie Cain

City Council District Four – Darrell Poling

City Council At-Large - Jean Johanningman

Please show your support and vote for change
